VIRTUAL ACADEMY

World Premiere

Collaborate as a classroom on a world premiere digital performance piece inspired by a core-curriculum topic or theme. World Premiere gives your students the chance to explore a content area of your choosing while inspiring individual and group creation.

This offering requires 6+ hours of live-interaction (scheduled weekly/bi-weekly over the course of a semester) with opportunities for creative exploration outside of class through written work, art projects, and video creation. Residency will culminate in an edited video of the students work that can be shared with your school community.

Suggested Themes:

Government

- Elections/Voting
- Democracy
